SUBJECT: FAS Base-Level Y2K Compliance Certification

The DLA Chief Information Office (DLA-CI) certified the FAS Base-Level System as being Y2K compliant on December 31, 1998. The FAS Base-Level System consists of a primary software application, Fuels Manager/Fuels Control Center (FM/FCC), running on Compaq PCs using Microsoft NT Workstation 4.0.

The version that was specifically certified was FM 4.0 with service pack 2 and FCC build 1024. The installation procedures for build 1024 include Y2K checking, and upgrading if necessary, each PC's basic input/output system (BIOS). Questions on the certification package may be directed to Major Myrna Miller, 767-.8656.
